

I would like to see affordable housing in Westport so that people who work in our town can afford to live here. Nevertheless, our zoning authorities should have control over where such housing will be built. This is necessary to avoid traffic and safety issues. It is also important to prevent our town from losing it's beauty and character.

Real estate developers have been using 8-30g to avoid local zoning laws that our officials have carefully crafted to tailor development to standards appropriate to our community. This must stop.
